# TAKE MOBILE CONTROL OF YOUR SECURITY SYSTEM

You can download the Virtual Keypad App™ to your Apple® iPhone or iPad® and take control of your security system from wherever you are.

Here are just two of the various features you can use:

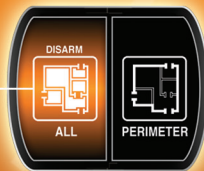

## To arm your HOME:

Tap "HOME" to ARM.  
Tap it again to DISARM.

## To arm your OFFICE:

Tap "ALL" to DISARM the system.  
Tap it again to ARM.

- ▶ Check your system status to be sure you turned your system on when you left
- ▶ Arm or disarm your system in an instant
- ▶ Select from the Home/Sleep/Away arming options for home systems
- ▶ Select from the All/Perimeter arming options for office systems

With Virtual Keypad App for your iPhone or iPad, it's like taking your security keypad with you wherever you go.

Talk to your security system professional to learn how you can download the app and take remote control of your security system.

Android version coming soon.
